

Tree Planting System "SAFE TREE"

A result of very long research and experimental tree planting

Specific Models

Based on the requests of our representatives around the world, **AZA's** team have studied, designed and determined specific models of the **SAFE TREE** system, able to be applied by everyone while covering the needs of the plants under any climate conditions.

They have been designed to be distributed, mainly, to the **2 billion people** who live in arid and deserted areas, with the intend to help them plant and grow trees there, but they can **be applied everywhere** in the planet.

**To be easily applied
by everyone**

Each model is packaged into a single carton box which contains all the necessary components and can be easily carried by hand.

For more information please contact us.
